

Build a Craft Stick Plane

Let your imagination soar with this fun craft activity!

MATERIALS:

Craft sticks
clothes pin or thick wood dowel
glue
paint or markers

DIRECTIONS:

1. Paint or color clothes pin/dowel. If needed, cut dowel down to desired length of 5-7".
2. Cut one craft stick in half, then cut off both rounded edges, leaving about $\frac{1}{4}$ " on one rounded edge.
3. Glue on two full-sized craft sticks approximately one craft-stick width from the front of the clothes pin on top and on the bottom. This forms the wings.
4. Glue the small all-straight craft stick on top of the clothes pin about one craft-stick width from the back to form the tail.
5. Take the larger rounded end, and glue it in the middle of the tail piece, perpendicular. This is the tail rudder.
6. Color or paint the craft sticks as desired.
